Detailer COVID Policy

v1 5-29-20

You've all been hard at work, going above and beyond with all of your prior cleanings. We want to thank you for all of your work! While your cleaning results have always left our vehicles spotless in the past, we want to establish a new and higher level of sanitation. It is beyond what other transportation companies do, but we want to ensure the safety and well-being of both our drivers and riders. You are essential to protecting the health of everyone who enters our vehicles.

- 1) Make sure vehicles are stocked with hand sanitizer.
- 2) Make sure vehicles are stocked with Lysol or Clorox wipes
- 3) Make sure that the waste bin from the previous trip has been removed and a fresh waste bin and bag are in the vehicle.
- 4) In addition to our normal cleaning procedures, please disinfect all surfaces that are commonly touched by customers and drivers after each trip.
- 5) If you are ill, do not come to work. Communicate with Trevor Freeman to work out an alternative plan to cover your shift. If you have been in contact with someone directly that has tested positive for Coronavirus, please communicate that with management.
- 6) There are three contactless thermometers in the storage unit and one on each V.A. bus. Please make sure these are wiped off and in their proper location on each shift.
- 7) A cloth face covering and gloves must be worn when disinfecting vehicles.
- 8) SLO Safe Ride will be following all state and federal guidelines. You can find the official information and state recommendations at: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. If you have any Coronavirus related questions, contact Noah Raynor at (818) 681-9065 or noah@slosaferide.com
